

# **SPIN ZONE**

Cycling Outfitters

## **Kids Bike Program**

*Spin Zone wants to see your child enjoy cycling and grow with the sport, which is why we offer the best youth bikes available, assembled and checked by our own skilled technicians. Your child will probably outgrow the bike long before the bike outgrows it's value. We therefore offer you a unique promise; when your child is ready for their next bike, we will trade in his smaller bike (purchased from Spin Zone) for up to 50% of it's original purchase price, depending on it's condition.*

*All we ask is that you take good care of the bike, keep it clean, protect it from damage and keep it stored indoors when it's not being used. It's OK to wash it with soap and water, and use a gentle water spray to rinse, but don't squirt water directly into the wheel bearings, cranks, or other moving parts. Keep the chain lubed with a good quality bicycle chain lubricant such as White Lightning, ProLink, Pedros', Park, etc. Don't use WD-40 or other oils as they tend to attract dirt instead of repelling it.*

*We appreciate getting to know you and your child, and wish you many happy and healthful miles of cycling!*

*Mike Shapiola*
